## **We are campaigning for...**

- Protecting our public forests
- Increased investment in our woodlands
- Better and improved access to open spaces
- Job security for the staff caring for our natural environments
- Recognition of our forests' role in combating climate change.

## Will you help us?

While the government has backed down on the proposal to sell-off the public forest estate, there are still threats to our woodlands and open spaces from the aggressive cuts of the coalition government.

Save Sherwood Forest is committed to representing the rights of the people to healthy and vibrant open spaces and fighting the cuts to our public forests.

**Please see our website for details of how you can help.**
