

Dear Ms Soubry

I am extremely concerned about the Health and Social Care Bill which the Government is trying to pass through Parliament. It is clear that the real purpose of this legislation is to privatise large sections of the National Health Service. This is likely to result in more expensive and less effective health care.

I want to receive from you your written assurance that you will immediately cease to support this Bill and that you will oppose any attempts to pass similar legislation in the future. Otherwise I will not consider voting for you in any future General Election.

Yours sincerely
